Price Guide for Modern Vision Correction

| Simply Wake Up & See

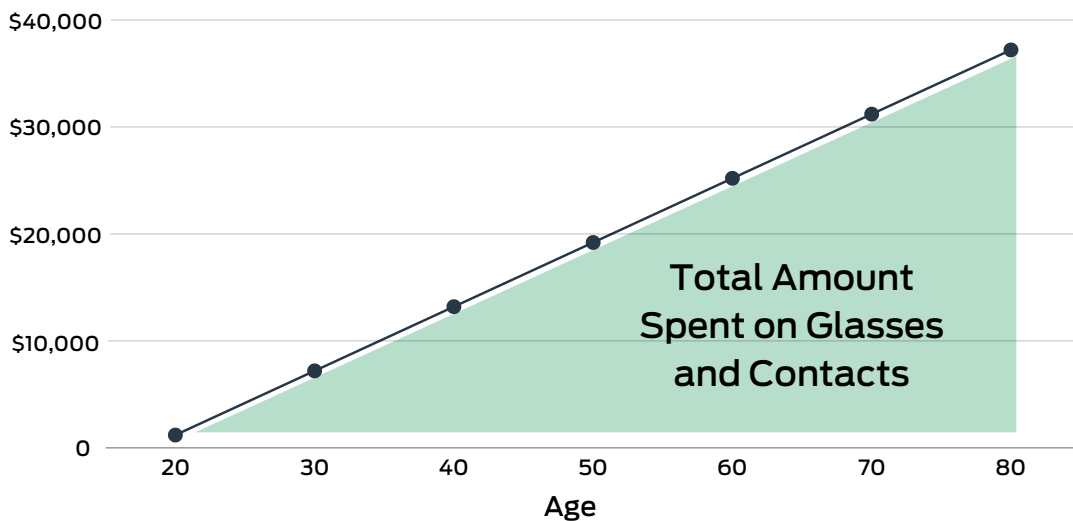

You are already spending money on your vision. Lots of it.

The reality: Americans spend anywhere from \$600 to \$1,000 or more each year on glasses and contact lenses plus the cost for eye exams to determine if there's been a change in prescription.

Is Modern Vision Correction Worth the Investment?

Over time, the cumulative cost of glasses and contacts adds up significantly.

Age	20	30	40	50	60	70	80
Cost	\$1,200	\$7,200	\$13,200	\$19,200	\$25,200	\$31,200	\$37,200

The Bottom Line: You're already spending a lot to "rent" vision correction. Isn't it time to explore a more lasting solution?

The Solution: Modern Vision Correction, including laser and lens-based procedures, offers a potentially permanent solution that lets you see without glasses, contacts, readers, or bifocals.

The Benefits

You could eliminate the expenses related to glasses and contacts or readers and bifocals and enjoy great vision every single waking moment of the day.

This is the promise of Modern Vision Correction. You get to simply wake up & see without having to put on glasses or put in contacts.

**“I save 5-10
minutes every
morning.”**

Modern Vision Correction is an investment in yourself. It's an investment that saves you time and money while allowing you to enjoy your daily activities even more.

MODERN VISION CORRECTION PROCEDURES

Ages 18-45

If you wear glasses/contacts for nearsightedness, farsightedness, or astigmatism:

- Modern LASIK
 - All-Laser LASIK
 - SMILE LASIK
 - Epi-LASIK
- EVO ICL (Insertable Contact Lens)

Age 45+

If you wear readers, bifocals, or progressives for near vision problems (presbyopia) -AND/OR - glasses or nearsightedness, farsightedness or astigmatism:

- Modern LASIK with age adjustment for nearsightedness (Blended Vision)
- CLR (Custom Lens Replacement)
- Refractive Cataract

Cataract Facts

- End-stage of an aging lens results in cataracts
- Basic surgery will replace the aging lens but does not optimize vision without glasses
- Modern Vision Correction allows you to see distance, intermediate and near and prevents future cataracts.

Modern LASIK

- The three different versions all use lasers
- Specific recommendations based on unique anatomy of your eye and results from the advanced diagnostic testing performed during your exam
- Age adjustment available for patients over 45

EVO ICL (Insertable Contact Lens)

- More appropriate than Modern LASIK for certain patients
- Immediate improvement in vision
- Does not alter corneal tissue
- Insertable lens that can be removed

CLR (Custom Lens Replacement)

- Excellent distance vision
- Allows for near and intermediate vision
- Aging lens is replaced and the optical system is stabilized
- Eliminates future cataracts

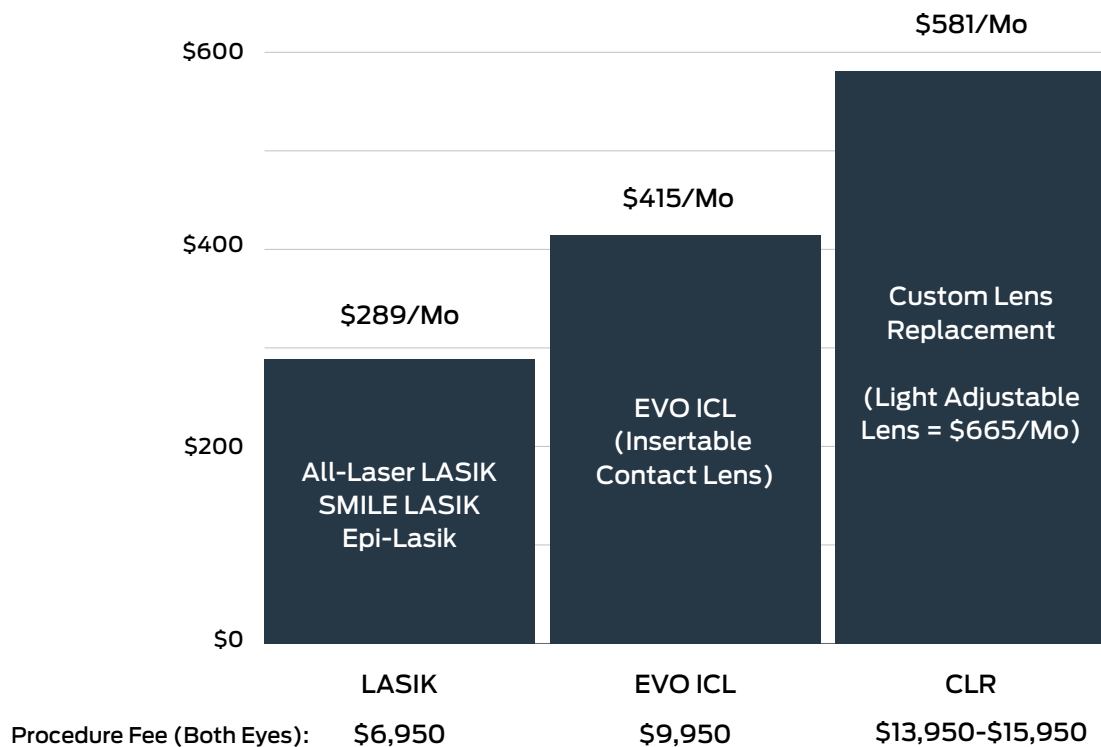

Modern Vision Correction Pricing and Affordability

Our Fee Includes Everything You Need:

- World-Class Surgeons and Team
- Prescription medications for healing
- All procedures performed onsite
- Both eyes treated same visit
- All exam visits for one year
- Any required enhancements in first year
- One additional enhancement (lifetime)

Monthly Cost

No-Interest Promotional Financing (24 Months)

Most people find that modern vision correction is **less expensive** than traditional glasses and contacts, depending on the age at which you have a procedure.

Use Pre-Tax Dollars for Modern Vision Correction

FSA/HSA Plans Can Save Up to One-Third the Cost

Did you know you can use your Flexible Spending Account (FSA) or Health Savings Account (HSA) to cover the cost of Modern Vision Correction? These tax-advantaged accounts allow you to set aside pre-tax dollars to pay for eligible healthcare expenses, reducing your out-of-pocket costs and overall tax burden. By using FSA or HSA funds, you can make a life-changing investment in clear vision with significant savings.

Benefits of Using FSA/HSA

- **Pre-Tax Savings:** Money allocated to FSA or HSA accounts is tax-free, saving you up to 30% on healthcare costs.
- **Easy Access:** Funds in FSA and HSA accounts are easy to use and can cover various medical expenses, including LASIK and other modern vision correction procedures.
- **Flexibility:** HSAs allow funds to roll over yearly, so you can build up a balance for larger expenses like vision correction when you're ready.

Ask our team about maximizing your healthcare savings with your FSA or HSA!
